

Featured Solutions Quick Reference Guide

Termidor® HE High-Efficiency Termiticide

- Cut time and labor in half on liquid termite treatments
- Smaller trenches, fewer drilled holes, and shallower treatment depths
- Spend less time on site and more time growing your business

BASF Time & Motion study

Trelona® ATBS Annual Bait Stations

- Active protection with annual inspections
- PMPs own the product and account: no reporting or added fees
- Termites find the station faster¹ with increased soil-to-bait contact

¹2012 University of Delaware, Graduate Research Dissertation

Alpine® WSG Water Soluble Granule Insecticide

- Non-repellent, non-pyrethroid option that makes a clear finished solution
- Great on German roaches, fleas, flies, and occasional invaders
- Excellent ant control with transfer effect
- Flexible label, allows for applications both indoors and outdoors

Fendona® CS Controlled Release Insecticide

- 100% micro-encapsulated formulation
- Wide spectrum insecticide that works great on spiders, mosquitos, and other pests
- Ideal for quarterly services

PT® Alpine Pressurized Insecticide

- Power of Alpine in a convenient pressurized formulation – ideal for tough accounts and clean-outs
- Non-repellent for use with baits
- Registered for use in food handling areas
- System III® compatible

PT Fendona Pressurized Insecticide

- Do more with less: alpha-cypermethrin 3x more powerful than cyfluthrin
- Go-to solution for maintenance accounts, with fast knockdown of key pests and proven long-lasting control of house flies and bed bugs
- System III compatible

BASF Internal Data, S. Thompson and F. C. Gordon

PT Alpine Flea & Bed Bug Pressurized Insecticide

- Non-soaking formulation for application to mattresses, carpets, and more
- Fast knockdown of adult fleas and kills hatching eggs for up to 7 months
- Kills bed bugs and ticks on contact and adult fleas for up to 30 days

Selontra® Rodent Bait

- Non-anticoagulant solution delivers fast colony kill, even to resistant rodents
- Stop-feed action means rodents only eat a lethal dose, leading to greater bait availability and shorter baiting cycle
- Low risk for secondary poisoning to birds and mammals

Always read and follow label directions.

Pests	Key Products by Pest See the BASF Pest Control Solutions product catalog for complete listing of available solutions			
Ants 	Alpine® WSG Water Soluble Granule Insecticide Indoor and outdoor application, plus food handling areas Non repellent A.I.complements bait applications	Termidor® SC Termiticide/Insecticide Outdoor, on-structure application, up to 4x per year	Advance® Ant Baits Indoor and outdoor application Blend of different ingredients and grit sizes to address various ant species	PT® Alpine Pressurized Insecticide Indoor crack and crevice and void application
Bed Bugs 	Alpine WSG Water Soluble Granule Insecticide Non-repellent solution effective against pyrethroid-resistant strains	PT Alpine Flea & Bed Bug Pressurized Insecticide Non-soaking formulation for application directly to affected areas, including mattresses	Alpine D Dust Insecticide Dust application for voids and hard to reach areas	PT Phantom® II Pressurized Insecticide Long-term residual for crack and crevice application
Cockroaches 	Alpine WSG Water Soluble Granule Insecticide Indoor and outdoor application, plus food handling areas Non-repellent compatible with cockroach baits	Alpine Cockroach Gel Bait Indoor and outdoor applications, plus food-handling areas Apply to cracks and crevices	Avert® DF Dry Flowable Cockroach Bait Bait/ingestion insecticide for use in wall voids and cracks and crevices	PT Alpine Pressurized Insecticide Indoor crack and crevice and void application
Fleas 	PT Alpine Flea & Bed Bug Pressurized Insecticide Non-soaking formulation for application to carpets and more		Alpine WSG Water Soluble Granule Insecticide Indoor and outdoor application Apply to baseboards, floors and under furniture	
Flies 	PT Alpine Pressurized Fly Bait Use for area treatments where flies congregate Also for use in removable bait stations	PT Fendona® Pressurized Insecticide Indoor and outdoor application where flies congregate	Alpine WSG Water Soluble Granule Insecticide Indoor and outdoor application Application to areas where flies are found, including resting and breeding areas	
Mosquitos 	Fendona CS Controlled Release Insecticide Long-lasting microencapsulated technology; outdoor applications against mosquitos and other pests Apply on surfaces where mosquitos rest, including shrubbery and flowerpots Can be used for mist blower applications			
Rodents 	Selontra® Rodent Bait Non-anticoagulant solution delivers fast colony kill, even to resistant rodents Stop-feed action of the A.I. means rodents only eat a lethal dose, leading to greater bait availability and shorter baiting cycles			
Spiders, Scorpions and Occasional Invaders 	Fendona CS Controlled Release Insecticide Micro-encapsulated formulation, labeled for outdoor applications Apply to the perimeter of any structure, including shrubbery, ground, around windows, exterior lights, under eaves	PT Fendona Pressurized Insecticide Crack and crevice application where pests enter Proven fast knockdown and long-lasting control of key pests	Alpine WSG Water Soluble Granule Insecticide Indoor plus outdoor and perimeter treatment Non-repellent solution with flexible label Ability to kill the food source of many predators like spiders and scorpions	PT Tri-Die® Pressurized Dust Insecticide Dust application for voids and hard-to-reach areas Use in cracks and crevices, voids, gaps around doorways and windows
Termites 	Termidor® HE High-Efficiency Termiticide Traditional liquid treatment application but with substantially less labor required Combine with EP/LI label directions to maximize time and labor savings	Trelona® ATBS Annual Bait Stations Install around the exterior of a structure to intercept termites as they forage Always place stations near conducive conditions and areas of suspected termite activity	Termidor Foam Termiticide/Insecticide Ready-to-use foam that works well as a spot treatment for above ground termite activity Requires drilling access points to treat termite galleries and wall voids	Termidor SC Termiticide/Insecticide Traditional liquid treatment application for termites in standard formulation Also labeled for ants, spiders, and 10+ additional key pests
