

# Aquicare® Wetting Agent

LAWN  
CARE

SPORTS  
TURF

GOLF  
MANAGEMENT

Aquicare® Wetting Agent is a safe product that helps reduce watering requirements to maintain turf quality and avoid turf loss. Aquicare® Wetting Agent is specifically designed to resist excessive water retention at the soil surface while maintaining optimal moisture levels in the root zone to provide a firm, healthy playing surface.

## APPLICATION RATE:

2 to 14 fluid ounces per 1,000 square feet

## INGREDIENTS:

**100%** Blend of Alkoxyated Alcohols

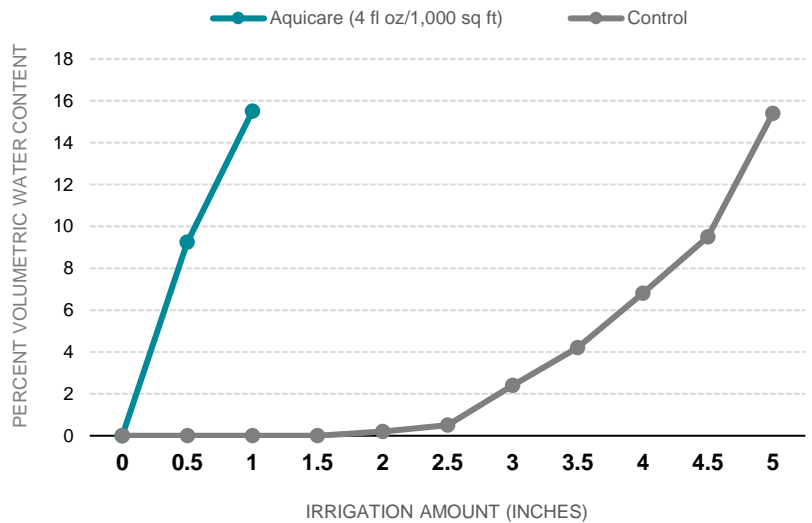

## FEATURES & BENEFITS

- Nonphytotoxic
- Resists excessive water retention at the soil surface while helping to alleviate localized dry spots
- Enhances surface firmness under wet conditions

## FASTER SPEED OF WETTING

The VWC of Aquicare® treated soil reached 15% VWC (adequate soil moisture) after one inch of irrigation. The untreated control did not reach 15% VWC until five inches of irrigation had been applied. The data suggests that Aquicare® can increase irrigation efficiency.

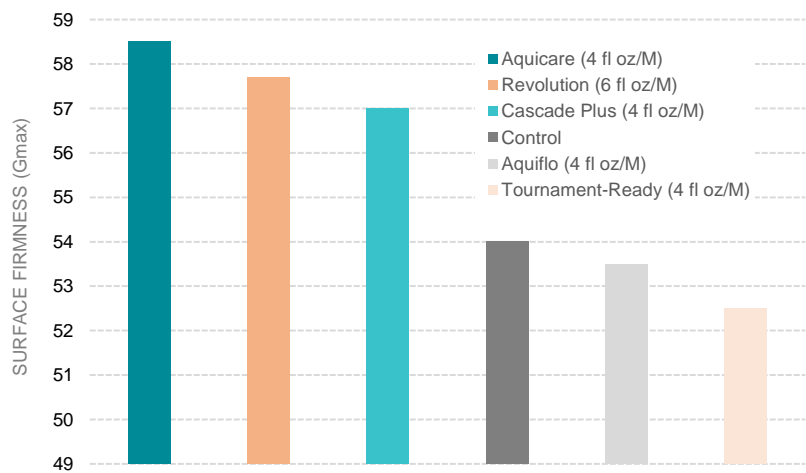

Karnok, K. University of Georgia, 2012

## PRODUCES FIRMER SURFACES

Surface firmness (Gmax) was not significantly different on any dates under excessive and moderate irrigation cycles. On August 29, 2013, when the turf was under limited irrigation, Aquicare® had significantly higher surface firmness.

Karcher, D. University of Arkansas, 2013
