

Aquisync®

Aquisync® Wetting Agent is a multifaceted wetting agent utilizing both retention and penetrant technologies to deliver top wetting agent performance in heavier soils and/ or thatch areas. The unique penetrant component helps water move off the surface, past any surface organic matter and into the soil. The proprietary retention agent increases soil water holding capacity to minimize/ reduce localized dry spots and stretch irrigation intervals. The combination of these activities leads to more uniform distribution of soil water.

APPLICATION RATE:

2 to 6 fluid ounces per 1,000 square feet

INGREDIENTS:

75% Ethylene oxide- propylene oxide copolymer

5% Sodium bis(2-ethylexyl) sulfosuccinate

20% Inert ingredients (water)

FEATURES & BENEFITS

- Improves water penetration in hydrophobic soils and through thatch layers
- Can be safely applied in a tank mix with a range of commonly used turf pesticides
- Optimized for use in non- sand-based soils, such as often seen on fairways, tees, sports fields and home lawns
