

*An Agriculture Cooperative Dedicated to Innovative Solutions, Excellent Service, & Long-Term Relationships*

## **Seed Quality Standards**

Mountain View Seeds works hard to provide the best quality grass seed in the industry. There are varying degrees of quality; Certified and Sod Quality are the two top qualities that can be obtained.

### **Certified Quality**

Grass seed lot must pass a 5-gram crop and weed seed exam from a certified testing center. Oregon State University is the only seed lab in Oregon that is certified.

### **Sod Quality**

To meet Sod standards at Mountain View Seeds, grass seed must achieve not only the industry's standard for sod quality, but additional requirements put in place by Mountain View Seeds to ensure only the best quality.

**Industry Sod Standard:** Grass seed lot must pass an Oregon State University 50 Gram Sod Exam.

**MVS Sod Standard:** In addition to the Oregon State University 50-gram Sod Exam, grass seed must pass an additional 50-gram crop and weed sod test from Agriseed Testing. This practice of double testing gives our customer's confidence and speaks to Mountain View Seed's commitment to provide the best product in the industry.
