

## Installation guide for rubber snowshoe harness

**First of all, please note the number associated to each hole in the harness.**

**1- Insert laces in holes #1 and #4. Please note that the snowshoe is shown upside down.**

**2- Pass the laces around the rawhide, return and insert through holes #2 and #3. Repeat on the other side.**

**2- Once the laces went through holes #2 and #3, tighten by pulling on both ends of laces and tie up in a bow. Repeat on the other side.**

**2- Insert the toe of the boot into the front of the binding and pull up the rubber tongue over the heel. Tighten the laces if needed.**
