«AURORA, ELGIN & FOX RIVER LIGHTWEIGHT» - HO Kit for Bowser drive #87-1292

Some paint and assembly recommendations:

Familiarize yourself with the prototype before painting and assembling.

Tools: Fine screwdrivers, tweezers, sandpaper, medium brush, soldering iron, primer and paint

To remove the car body, loosen the screws with a red dot on the floor.
Remove the roof, headlight and retriever before priming/painting

Brush body and roof with a medium brush, clean with alcohol or soap. Prime body and roof once or even twice.

There may be some adjustments necessary to the shaft length when mounting the Bowser drive.
Be careful with the soldering iron when mounting the Bowser drive, protect plastic from heat.

Remove protective film on the window glasses before final mount.
Glue window guards with a few dots of white glue (MicroScale KristalKlear)

Protect model from hard sunlight and heat.
