MADE IN THE U.S.A

INSTALLATION PROCEDURES: The following information is to assist in the installation of a Whelen Ground Crew Call Horn.

- Using approved connectors, wire the unit as shown (Fig.1). Tighten the hardware until a maximum torque value of 6 in./lbs. is achieved.
- 2. Install the unit using the mounting diagram shown (Fig.2). Insure that the wire leads are clear of any obstructions and ty-wrap as required.
- 3. Check all avionics systems for interference from the installation.
- 4. A flight check should be performed by a properly certified pilot.
- 5. Update aircraft records, complete Form 337 and obtain FAA field approval for installation, if necessary.
