

USER MANUAL

REMOTE PAIRING

1. Ensure the your Sea-Legs box is properly connected to a power source.
2. Open the Sea-Legs box and locate the LED on the board. Once powered, the LED will be displayed as green.
3. Locate the learn button on the board, then press once to enter discover mode. When in discover mode, the LED will be displayed as red and green. Discover mode can be exited by pressing the learn button again, which will return the LED to green only.
4. While in discover mode, press any button on your Sea-Legs remote to begin pairing.
5. Once the board detects the new remote, the LED will switch back to green. Your remote is now paired.
6. If you ever need to unpair your remote, hold the learn button for 10 seconds. The LED will turn off and then return to a green display.
