## YOUR ESSENTIAL WRAP DESK AND FILLER

As you are planning your space, you may find you need more counter space or corner fillers to complete your design. The essentials collection has you covered. All the little details have been thought through for you so you can just build the display area you've been dreaming of.

The essential wrap desk has been created to provide additional storage and surface area to go along with the cash desk. The wrap desk has predrilled adjustable shelves hidden behind a solid front to keep all your retail clutter hidden from customers. Wrap desks work well paired with cash desks and showcases.

The essential filler (sometimes called corner piece) is a key fixture when putting multiple showcases together. It ensures your staff can access all of the functionality of your showcases and wall cases while preserving your overall display look.
