

# RemoteLOCK™

## RL 4000

## The Ideal Smart Lock for Resorts and Rentals without Wi-Fi.

The RemoteLock RL 2000 is designed for properties without Wi-Fi connectivity and is built to last. Schedule access for guests from anywhere without the lock needing to be connected to Wi-Fi. This algorithmic lock allows you to schedule access for each guest, providing each with unique credentials. Integrate with AirBnb, VRBO and more to schedule or automate guest access.

RemoteLock's EdgeState software lets you manage access from anywhere, receive alerts and notifications, and eliminates the hassle of key exchanges. This sturdy, commercial grade lock is weatherproof and perfect for challenging outdoor conditions.
