

RemoteLOCK™

openEDGE RG

**BUILT FOR
RESIDENTIAL USE**

The Ideal Smart Lock for Residential Use.

RemoteLock's OpenEdge series of smart locks can be remotely controlled and managed from the cloud. RemoteLock's industry-leading SaaS, EdgeState, integrates connected locks into a single point of control.

The **RemoteLock OpenEdge RG** is the perfect solution for residential, vacation rentals, and small office applications.

This powerful, residential grade Wi-Fi smart lock allows users to lock and unlock doors remotely and receive text alerts when codes are used.

Users can also issue new codes, delete existing codes, and provide temporary access to guests, all from a smartphone or computer.

The OpenEdge RG works directly with on-premises Wi-Fi service and doesn't require a third-party gateway or controller.

The OpenEdge RG is perfect for many deployment scenarios, including:

Hospitality: RemoteLock has years of Vacation Rental/Hospitality experience integrating with Airbnb, HomeAway, VRBO and many others allowing seamless management of bookings and guest access codes.

Multi-Family: RemoteLock eliminates the need to rekey doors or entire properties when keys are lost or tenants move in. Save money and avoid the hassle of rekeying.

Commercial: RemoteLock delivers codes to staff, monitors access and code usage while delivering detailed access and control reports.

RemoteLock Wi-Fi technology has been embedded into the lock, making it unlike any other lock on the market. Manage one or thousands of connected smart locks from the EdgeState platform.

Ideal for many scenarios.

Residential
