The Gel System Pre-ink Stamp

Gel System Production

A E Stamp is using a U.S. Gel System Production Technology. This High-Technology Production System can produce stamp with crystal clear imprint, dries almost instantly on glossy paper with water-proof print out ink.

Quality Guaranteed

Proven to be still in excellent condition after machine test print continuously for over 20,000 imprints

Fast Drying Time

Clear Imprint

A E Stamp can provide crystal clear impression even with point size as small as 3 point, while no other pre-inked stamp can perform the same.

For Colop's Quality Standard And Services

MORE THAN 90% OF

COLOP STAMP RANGE

CO2 neutral

As early as during product development, attention is paid to resource conservation and the use of sustainable materials. The use of recycled plastics is constantly optimised and increased, and energy and raw materials are used as efficiently as possible. The in-house photovoltaic system produces a considerable part of the electricity required at the Wels site. The significantly reduced but unavoidable CO2 emissions of products - manufactured at one of the two production sites in Wels, Austria or Borovany, Czech Republic - are offset by investments in climate protection projects. This means that more than 90 % of all products in the COLOP stamp range can be described as climate neutrals.

The Rubber Type Printing System

RIBtype®

The RIBtype rubber type system allows you to easily change printed information on cartons, packages and products.

Each piece of rubber type has ribs on the back so it can be pressed into the ribbed rubber base on your marking equipment.

This type is used on coders, marking machines, hand printers and stamps that have the rubber rib-base with them.
