## Stylish, Superior, Sublime Speakers ...

JENSEN® engineers take their time. For over 41 years they have pushed the boundaries of sonic performance but it's worth the wait when the result is the stunning QX range of flexible Hi-Fi and Home Theatre packages. QX has the lot. Tall, sleek, elegant – décor matching was never so easy. There's even a 10 year warranty. It took a while, but wait until you hear the sound ... sublime.

### QX-0.5 Single Speakers

Size doesn't matter! These diminutive triangular enclosures pack an awesome 112 db punch. JENSEN's magnetic shielding and omni-directional brackets mean that you can direct your sound wherever you want it – vertically, horizontally, on the monitor, on the ceiling. And if all that sounds good, the silver paintable enclosures let you match the speakers to your décor exactly – indoor or outdoor. At last, speakers that give you a say in how they look! Available in pairs or singles.

### QX-2005 All-in-one, 5.1 Speaker Package with Mounting Brackets

This is extreme sound guaranteed to put the 'wow' factor back into home theatre. Take one monster 160 Watt QX-80 powered subwoofer and combine it with five high powered QX-0.5 modules, which because they're magnetically shielded, can be mounted anywhere – on the monitor, on the wall, on the ceiling, and JENSEN's omni-directional brackets mean they can be swivelled to optimise sound direction. You can even add a single QX-0.5 to make a 6.1 system. A perfect sound solution guaranteed to put the 'hallelujah' into any chorus.

### QX-10 and QX-20 Surround/Bookshelf Speakers

Sensitive, new age sound in touch with its inner beast! JENSEN engineers have incorporated a high efficiency polycell soft dome tweeter featuring a 25 mm ferro-cooled voice coil and a huge 142 gm (5 ounce) magnet. The midwoofer is a solid, low mass, high efficiency masterpiece (100 mm in the QX-10 and 130 mm in the QX-20). Both use twin easy-mount wall brackets for easy installation and feature tweeter circuit protection. Shallow enclosures (154mm) provide that tailored snug-to-wall look for a clean fit. High-powered and low distortion. Gentle in its quiet times, strong and powerful when you turn it up! Both models also suitable for bookshelf application.

### QX-30 and QX-40 Floor Standing Speakers

Sleek ... slender ... tall ... small footprints – these are the supermodels of the JENSEN QX range. Except these supermodels have a big, fat sound! Engineered for crystal clear hi-fi or front staging home theatre systems, they are Plasma compatible. Internal bracing, massive crossovers and solid enclosures provide strength as well as good looks and butyl rubber surrounds on the drivers ensure that moist, humid conditions don't dampen your sound. JENSEN engineers have even designed magnetic grille fittings for that clean, self-aligning look. JENSEN's woodgrain Wild Cherry, high gloss Graphite Black and Titanium Silver finishes won't show fingerprints which lets this supermodel fool everyone with that 'don't touch' persona!

# QX

## JENSEN Monster Woofers

Make the earth move for you with massive magnets and colossal voice coils making for bigger than big bass legends. Thumping big bass never felt so good.

## QX-50 The Flagship Floorstanding Speaker

Think sweet. Think elite. Think again! The QX-50 is lean, mean and dynamic! The sheer elegance of its looks belies the power and high tech interior. Ideal for soothing HiFi or the thunderous excitement of Home Theatre - these top of the range speakers are awesome! The smooth as silk tweeter and triple 6.5" Woofers are all magnetically shielded and superbly crafted into an enclosure tuned to a low 40Hz – this is how deep, tight bass really sounds. The enclosure has all the trimmings – metal spikes which suit carpet or boards, magnetic grille fittings and JENSEN's unconditional 10 Year Warranty. The QX-50 is the upper echelon of sound – and the sound is dynamite!

QX-50

Unconditional 10 Year Warranty (1 Year on amplifiers) on faulty materials and/or workmanship and all user related overpowering problems. Warranty Registration Cards need to be returned for warranty validation.

## QX-60 and QX-70 Centre Channels

This is the real deal of home theatre sound designed to bring Hollywood right into your lounge room. Full magnetic shielding means that the speaker can be positioned directly on the monitor for 'in your face' dialogue without video distortion. Sure, there's JENSEN's new polycell dome tweeter which delivers glass shattering shrieks, orchestral frenzies and all the passion and power of the movies, but there are also the dual midwoofer and quad midwoofer to let you hear the hushed tones, the gentle whispers and all the subtleties of cinema sound. The QX-70 has its two outer drivers splayed six degrees for wider dispersion.

QX-60

QX-70

## Crossover Tweeter Protection

The heartbeat of every JENSEN® speaker. This electronic nerve centre effortlessly splits, smooths and divides audio signals to the tweeters, midwoofers and woofers. Tweeter circuit protection is available on all models and protects your system just in case you like to crank it up a little ... and we suggest you do.

## QX-80 and QX-90 Subwoofers

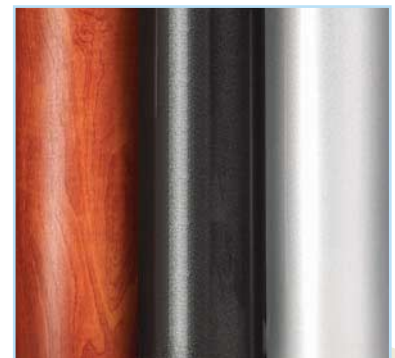

Get your floors jumping and your walls thumping with big, bad bass! DVDs and CDs are jam packed with it – the type of bass sound that you feel inside. Each glass topped QX subwoofer is fully loaded with monster subwoofers ready to explode with up to 250 watts of pure audio dynamite through on-board, extremely-high-current amplifiers. High performance, high volume, high powered subwoofers that make sound a tactile experience. These are monsters you definitely want in your home!

QX-80

QX-90

## QX Speakers Colour Selection

Wild Cherry • Graphite Black • Titanium Silver  
Black & Silver are premium quality, Designer High Gloss finishes with a subtle metal fleck. All models (except QX-0.5 and QX-2005) available in 3 colours. QX-0.5 is fully paintable.
