

Stylish & Elegant

Sounds Great Too!

JENSEN[®]
EXPLOSIVE HOME THEATRE

Extraordinarily beautiful & capable speakers

Jensen engineers are fanatics! For over 41 years they have been pushing the boundaries of sonic performance and sheer lounge room elegance.

This stunning new JENSEN SPX range with its tall, slim enclosures allow décor matching a breeze with colour choice, 10 Year Warranty and flexible Hi-Fi and Home Theatre packages.

SPX-2002. All-in-1, 5.1 Speaker Package with mounting brackets.

If you are looking for an extreme home theatre speaker system, then this SPX-2002 is the system for you. Combining 5 (paintable) Hi-Powered SPX-3 modules with a monster 10" SPX-17 glass top Subwoofer with 160 Watts of power. This system is perfect for people who love the Sound of Music. As well as the occasional smell of napalm in the morning.

SPX-3. Mini Home Theatre, Surround or Bookshelf speaker.

Heard a Dinosaur howl at 112 db from almost invisible speakers? Paintable triangular enclosures with brackets allow for several mounting options -sitting on top of your TV, mounted horizontally in a wall / ceiling corner angling down or vertically on a wall, simply rotate the badge and swivel for best sound direction. These magnetically shielded SPX-3's are solidly built to be heard and not seen. Brackets included.

SPX-4 & SPX-5. Compact Bookshelf / Surround Speakers (Black, Beech & Cherry)

Hi-Powered and Low distortion. The midwoofer is a lightweight, low mass, high efficiency masterpiece (100mm in the SPX-4 and 160mm in the SPX-5). The sound is tight, clean, and dynamic. Both use front porting for easy installation and feature tweeter circuit protection. We use a High efficiency polycell Soft Dome tweeter with a 25mm ferro-cooled voice coil and a huge 227 gm (8oz) magnet - capable of reproducing any dynamic performance.

SPX-7 & SPX-9. Floorstanding Speakers. (Black, Beech & Cherry)

Sleek pencil thin enclosures. Small footprint - big sound. Designed for Sparkling clean Hi-Fi listening or Front staging Home Theatre. Drivers use butyl rubber surrounds to safeguard against damp or humid conditions. Internal bracing, massive crossovers and solid enclosures are typical of Jensen SPX series.

SPX-11. Floorstanding Speaker with inbuilt Powered Subwoofer. (Black, Beech & Cherry). Don't let looks deceive you. This is a ballerina with a hand grenade. With the flagship SPX-11's elegant external appearance standing on tippy-toe spikes, each enclosure is divided into two internally sealed chambers. The top section is a sweet as silk performing speaker system, and the bottom section is a Sherman tank. With inbuilt SPX-17 side-firing subwoofers, there is no need for a separate subwoofer enclosure to clutter your lounge room, although we added an output that can couple as many Jensen subwoofers as you may need!!

JENSEN MONSTER WOOFERS.

Nothin' lower and nothin' louder deep bass legends. Huge magnets, huge voice coils to feel every earth-quaking, Schwarzenegger -shaking blast and boom Hollywood can thump out.

JENSEN®

10 YEAR WARRANTY

Unconditional 10 Year Warranty (1 Year on amplifiers) on faulty materials and/or workmanship and all user related overpowering problems.

Warranty Registration Cards need to be returned for warranty validation.

SPX-13 & SPX-15. Centre Channel. (Black, Beech & Cherry)

In the evolution of Home Theatre sound, this is the BIG BANG. These stylish models will give you all the punch and power Hollywood can pump out, and right in the middle of it all, clean crisp dialogue. Our Dual midwoofer and Quad midwoofer model put hushed whispers and piercing screams front and centre. Both models have full magnetic shielding so you can place the speaker directly on top of your monitor, without any video distortion. Horror films anyone? Our new Polycell Dome tweeter can take a Jennifer Love Hewitt scream clear up to 21,000 blazing hertz. Sleek designs, beautiful performance, but at times horrifying.

SPX-17 & SPX-19 (Black, Beech & Cherry) Powered Subwoofers.

You know what's being packed into every DVD movie and audio CD like never before? Huge Bass. You feel it when the theatre thumps and the Dance floor throbs. Now what JENSEN's done with all this sound is to help it travel. Right into your living room. We'd like to introduce a monster subwoofer to your house. In the form high performance, high volume, powered subwoofers that can literally, create an outer body experience. Each Glass top SPX subwoofer is fully loaded with monster subwoofers as well as being fully loaded with up to 250 Watts of pure audio gunpowder. In the form of our on-board, extremely hi-current amplifiers.
