

## Assembly instructions

- Use a Hammer to put the nails into the wall.
- Put the birds with a pressure on the nails - so that they are flat on the wall.
- Add some glue in the hole of the bird, and put the bird on the nail, for a stronger fixation.
- For special walls and surfaces use a two-component adhesive.
- To palce more birds on a wall, use post-its to find the best formation, before mounting them.
