**DESCRIPTION**

The 4" Low Voltage New Construction Housings provides crisp, defined illumination to any application. It is for use in commercial or residential non-insulated ceilings, where insulation can be kept 3" from fixtures. Rated for use with a low voltage MR16 lamp. A wide variety of attractive adjustable trims allows fine-tuned aiming of directional light sources.

Two 13-3/4" to 24-1/2" adjustable bar hangers with captive nails are included on frame. Bar hangers are parallel to the junction box but can be repositioned 90° perpendicular to junction box if desired. "L" Shaped bar hanger foot to align to the bottom of construction joist. A T-Bar notch allows for easy installation in a suspended ceiling.

The Non-IC housings require a minimum clearance of 3" from thermal insulation and 1/2" from adjacent building components. Email sales@step1dezigns.com for IC Airtight Recessed Housing options.
