### DESCRIPTION

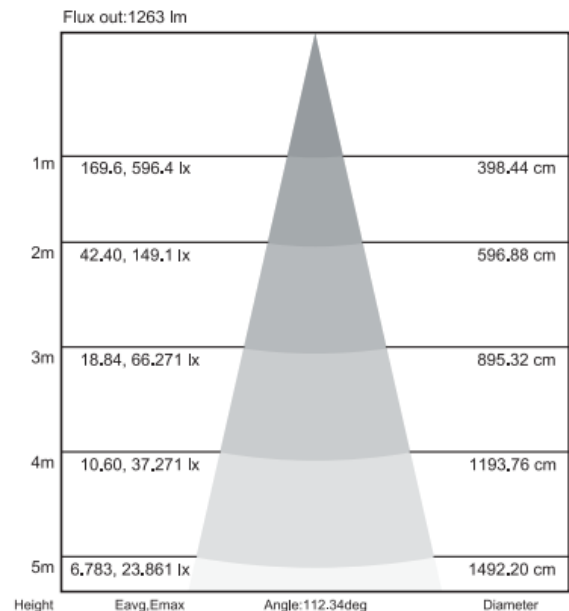

The LED Motion Sensing Down Light is a great choice for accent, recessed, and general lighting. Featuring a built-in motion sensor and available in 5000K cool white LED color temperature. It delivers 1300 lumens of high lumen output while only consuming 18 watts of power.

### KEY FEATURES

- Replace Incandescent Save Up to 80% Energy
- Instant Bright, High Power LED chipset
- When Motion is detected, it turns the light ON and turns the light off after about 2 minutes when the room is vacated
- EnergyStar, cETLus Listed, FCC

### APPLICATIONS

- Closets
- Hallways
- Stairwell

Note: The Curves indicate the illuminated area and the average illumination when the luminaire is at different distance.
