### DESCRIPTION

12V DC Color Changing RGBW LED Sign Module lights are rated IP65 for outdoor or indoor lighting applications. They come with flexible wires and easy to install. Because the wires are flexible, you can easily arrange your LED modules around your installation as desired. It contains 3 energy-efficient RGB LED Chipsets per module for a 140° beam angle. Each LED module is made with an injection-molded PVC plastic housing that is rigid and lightweight.

About 3.25 inches of wire between the RGBW LED modules. 2 modules per 1 ft. length. Each set comes with 20 modules per string.

Each LED RGBW sign module comes with double-sided 3M foam tape on its back. Simply peel and stick the LED module to the position desired.

They are dimmable if used with compatible RGBW controller and drivers. LED RGBW controllers and drivers are sold separately. Cut LED modules are not returnable. Use with DMX Operating Control Board for custom lighting scene.
