## DESCRIPTION

LED Static Color Sign Module lights are rated IP67 for outdoor or indoor lighting applications. They come with flexible wires and easy to install. Because the wires are flexible, you can easily arrange your LED modules around your installation as desired. It contains 3 LED Chipsets per module for a 175° beam angle. Each module is made with an injection-molded PVC plastic housing that is rigid and lightweight.

Each LED sign module comes with double-sided 3M foam tape on its back. Simply peel and stick the LED module to the position desired.

The LED Modules are dimmable if used with compatible dimmers and drivers. LED dimmers and drivers are sold separately. Cut LED modules are not returnable.
