

The EW-M35 sets the standard for quality and portability. With its tubular design and reinforced frame structure, none other will compare. The sleek design, padded armrest provides the rider with both comfort and performance. The removable battery pack with wireless connection can be charged on or off the unit. Equipped with puncture proof tires, swivel seat and delta tiller are just a few features that makes EWheels Medical a world class leader in mobility.

Features include a maximum speed of 4 MPH, a 300 pound weight capacity, puncture proof tires, compact size for easy transportation and disassembles in seconds.
