

Expandable Bariatric Bed Frame

As the brawnier version of our RC 750, the RC 1000 is an economical 1000 lb capacity bed frame with five function electric control. The simple to use pull pin system allows caregivers to easily expand the bed frame's width from 39" to 54" to accommodate various patient girth and emergency transport through 40" door frames. Its split frame design allows for easy delivery into tight areas. The RC 1000's reasonable price makes it an excellent bariatric bed solution for the alternate care market.

Multi-functional Bariatric Capacity in an Affordable Package

SCALE

Elevate safe patient handling with weigh-in-bed capability to lower the risk of falls and skin shear

SPLIT FRAME

Flexible storage and transport through narrow doorways to deliver care when needed

INTEGRATED WIDTH

Expandable width for patient comfort and repositioning while enabling emergency transport

Standard Features
