xSiCute External IP68 48 Fibre Splice Box

xSiCute compact IP68 rated moulded plastic external splice box suitable for protecting up to 48 fibre splice terminations. Supplied as standard with 2 x 12 position fibre splice tray and can accept an additional two trays if required. Trays are hinged to allow access to other trays and open beyond 90 degrees enabling unencumbered access to installed fibres. Resistant to vibration and UV with a water-tight seal suitable for direct burial. Can also be wall mounted .

With two cable entry/exit points with mechanical environmental seals. No specialist tools are required to enter the enclosure and re-entry to joints can be made without disturbing existing fibres. Cable strength members are included as standard.

Compliant with IEC standards covering water immersion, UV resistance, temperature cycling, salt mist, fungus resistance, chemical resistance and re-entry testing. An excellent temperature range of -40 degrees to +65 degrees for extreme weather conditions and long-term reliability.

Features:

- IP68 rating with watertight seal suitable for direct burial.
