

xSiCute surface mounted fibre wall cabinets for secure high-density fibre patching. Manufactured from 1.2mm mild steel with a light grey RAL7035 semi-gloss finish. With two hinged lockable doors dividing the termination and patching areas to prevent tampering. Each door lock is unique allowing access only to authorised personnel. Supplied loaded with couplers

Cable entry knockouts and patch cord exits are situated at the top and bottom of the cabinet and pre-drilled fixing holes allow it to be mounted either way up so the doors are hinged left or right. All ports are numbered for identification. Complete with 4 x Kurly Lock cable managers and 1 x PG11 gland.

- Two hinged lockable doors divide terminating & patching areas and prevents tampering.
- Unique door locks allowing access only to authorised personnel.
