

# TITUS METALS

## RING SIZE GUIDE

### Measure Current Ring

1. Find a ring that fits your intended finger.
2. Match the inside edge of the ring to the nearest circle size on the right.
3. If the size falls between two circles, order the larger size.
4. Be sure to check your size again for accuracy.

### Use The String / Paper Method

1. Grab a non-stretchy piece of string or a strip of paper that is about 155 mm long (width is optional)
2. Wrap it around the finger you want to measure and use a pen to mark the point where it overlaps — basically forming a complete circle
3. Compare the length of the string or paper to the following lines on the side to determine your ring size and order the larger size if you happen to fall between two sizes.
