VEROBOARD®

IR SENSOR SWITCH
Manual & Installation

Feature

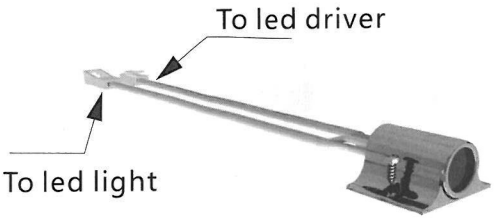
- Replaceable design, the wire and the controller are connected by a buckle, which is convenient for maintenance;
- Integrated design, the controller is combined with sensor, simple structure;
- suitable for both recessed and surface installation
- Hidden sensor lens

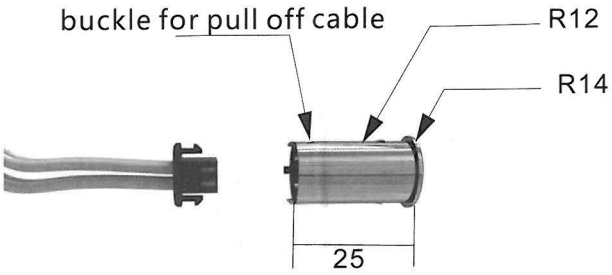
Specification

Voltage:5V/12V/24V
Max load : 5V20W : 12/24V60W
Detecting distance : 6-10cm

Function:
Ir detection: when open door light on, close door light off

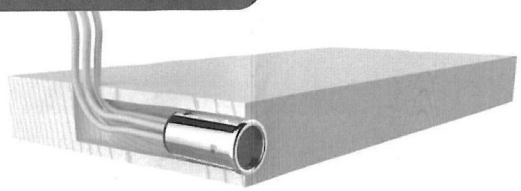
Size



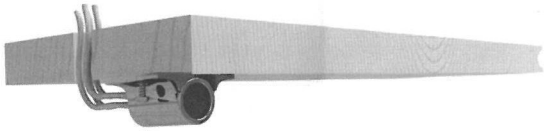


push buckle to pull off cable when replace sensor

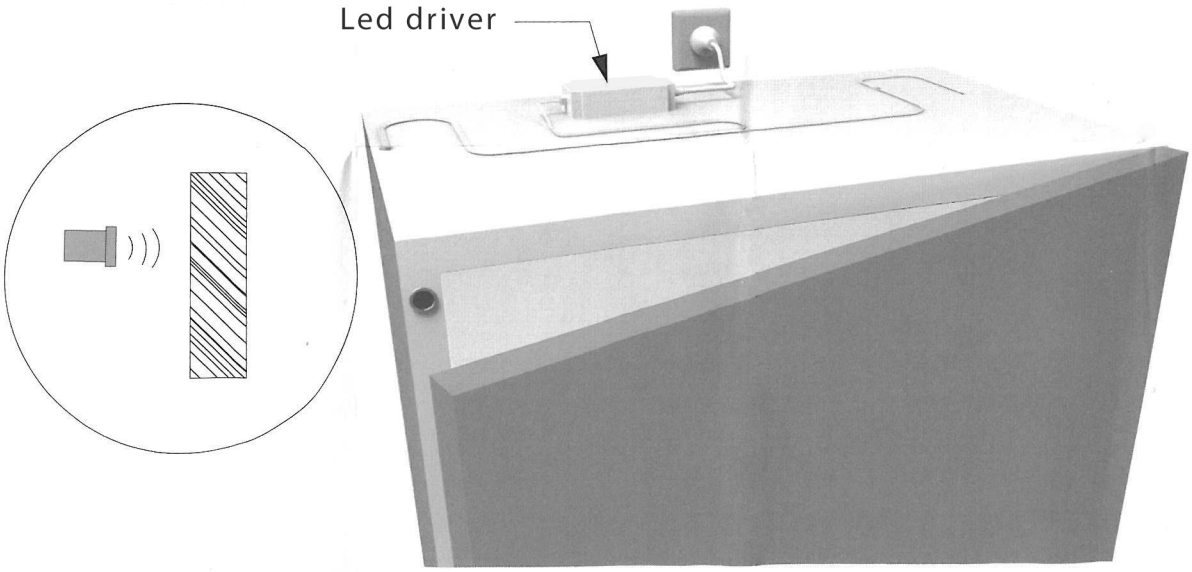
Installation



·recessed installation drill hole 12mm



·surface installation with screw



RoHS CE
