## RECOMMENDED SIZE AND MOUNTING OPTIONS

### UNIVERSAL MOUNT

If you have additional questions, consult an authorized Big Ass Fans dealer or design expert.

\* Shorter downrods not recommended for 72-inch fans on sloped ceilings.  
 Note: Minimum required clearance of two feet to nearest wall and seven feet from floor to lowest point of the fan. Restrictor ball and optional guy wires provide redundant security for mount and fan assembly. Recommendations do not take ceiling pitch into consideration.
