# RECOVERY GEAR TO TAKE YOU TO EXPLORE THE UNSEEN.

ANTARCTIC  
CIRCLE

George4x4 was established in Brisbane, where the forests are dense, mountains are epic, waves are strong. George4x4 was born to provide awesome gear and services for 4WDers.

George4x4 group has more than 20 years of experience in manufacturing and supplying lifting materials to over 30 countries worldwide. We aim to provide strictly tested premium-quality gear at affordable prices for our valued customers. We are keen to take the adventure with you!

## What George4x4 Presents

The first hitch with round eyelets

The first hitch with pear-shaped eyelet for big soft shackle

The first soft shackle with a black eye (a short protective sleeve at eyelet so it can effectively protect the soft shackle from abrasion)

Most product lines of lightweight gear

Most sizes of the soft shackle (customized orders for all lengths)

Manufacturing a rope gear requires attentive consideration of multiple factors to ensure it functions properly. Factors such as raw materials, string tightening, coating technique, rope protection, strength, weight and aesthetics are well-reviewed before the production of each rope gear.

Premium quality merits time and conscientiousness. You literally can't find a more meticulously rope manufacturing system than George4x4 rope gear.

# TESTING & SPLICING

## QUALITY CONTROL

We pay serious attention to products' quality control. George 4x4's ropes are all strictly tested from batch to batch before splicing. Once the processing is finished, final product testing will be done. To increase the safety of products, George4x4 has all products tested individually and also as a set. Testing results are supported by NATA Accredited Lab.

## AUSTRALIAN MADE / DESIGNED / TESTED

George4x4 Rope Gear including Soft Shackle, Tow Rope, Bridle Rope and Winch Rope are all hand spliced in Brisbane, Australia.

George4x4 products including Black Eye Soft Shackle (Soft Shackle with a short protective sleeve at eyelet), SK+ Hitch (Soft Shackle Hitch with Pear-shaped eyelet) and Winch Ring (Snatch Ring with Curved surface and Wider groove) are all designed by George4x4 group.

# SOFT SHACKLE

## | Facts about Soft Shackle |

- Soft shackles are designed for safer/stronger/lighter and easier use, originated from fishing. Work well as a joint for 4WD.
- George4x4 Soft shackles are all designed, made, and tested in Australia. 100% Australian products guaranteed.
- "Black eye" is designed by George4x4 team for a longer use life of soft shackles.

**BUTTON KNOT:**  
tails buried in, stronger, better looking,  
approx. 20% bigger tensile force

**DIAMOND KNOT:**  
tails come out, strong enough, more  
economical

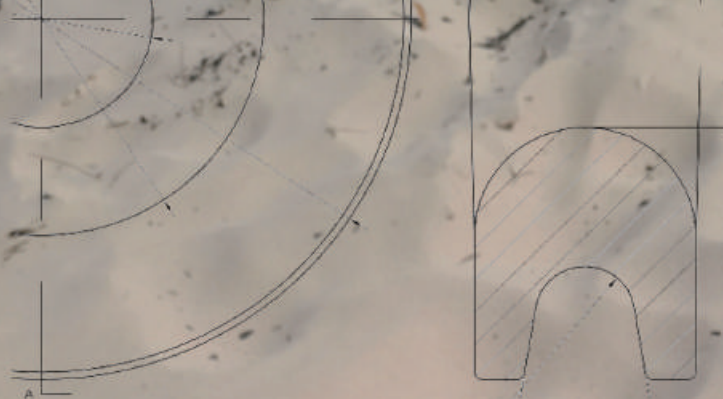

George4x4 is proud to present safer, stronger,  
lighter soft shackles with a range that includes  
button knot and diamond knot soft shackles.  
All hand spliced in Brisbane, Australia  
Tested by NATA accredited lab

# SOFT SHACKLE

## KEY FEATURES:

- Black eye designed
- Protective sleeve fitted
- Made with rustproof ropes, well known as dyneema/spectra
- High abrasion and impact resistance
- High visibility and adequate UV resistant
- Super lightweight, floats in water & mud
- No threading necessary, easy to handle, one-piece construction

Winch ring is designed to fit soft shackle and synthetic winch rope only. Light in weight, easy to store and use.

# WINCH RING

Winch ring, also known as snatch ring or pulley ring, is an ideal alternative of traditional snatch block with no sharp edges.

George4x4 offers 11000kg and 15000kg winch rings. Premium quality guaranteed.

**SIZE 11000kg**

BS over 12000kg

Rope running up to 14mm

Outer/inner diam:

100mm/30mm

**SIZE 15000kg**

BS over 16000kg

Rope running up to 16mm

Outer/inner diam:

125mm/32mm

**KEY FEATURES:**

- New designed with wider groove and curved surface
- Strictly tested in Australia by NATA accredited lab
- Solid aluminum machined and polished, lighter, safer and more durable

# WINCH RING

# TOW BAR HITCH

# TOW BAR HITCH

George4x4 offers hitches for steel shackles and soft shackles.  
Premium quality guaranteed.

SK vs SK+

SK stands for Soft Shackle

SK+ is SK with larger eyelet

### Caution

- Soft shackle can only be connected to SK series hitch.
- SK series hitch fits both soft shackle and steel shackle
- Regular hitch cannot connect soft shackle but only steel shackle

### KEY FEATURES:

- Made with solid aluminum or steel
- Multiple holes designed to connect vertically and horizontally
- Working load limit 5000kg, minimum breaking strength 20000kg
- Suit standard hitch pin (16mm)
- Strictly tested in Australia by NATA accredited lab

**Standard Hitch**

- WLL 5000kg, BS 20000kg
- Suit for steel shackles only
- Made of aluminum alloy or solid steel

**SK/SK+ Hitch**

- WLL 5000kg, BS 20000kg
- Suit for soft shackles and steel shackles
- Made of aluminum alloy (Billet aluminum)
- SK hitch designed for soft shackles up to 11mm
- SK+ hitch designed for soft shackles up to 13mm

# SNATCH STRAP

**KEY FEATURES:**

- George4x4 straps made of top quality 100% nylon
- Highly elastic that can be elongated up to 20%
- UV resistant, water proof and more durable
- Both ends have reinforced eyelets
- Comes with 2pcs removable sleeves

BS: 8000KG\*9M

BS: 11000KG\*9M

BS: 17000KG\*9M

BS: 21000KG\*9M

# BRIDLE STRAP / EQUALISER

**KEY FEATURES:**

- UV resistant, water proof and more durable
- Heavy duty reinforced eyelets
- Used as Tree trunk protector/tree equaliser

100% nylon

BS: 11000KG\*3M

100% polyester

BS: 14000KG\*3M/4M

# BRIDLE ROPE

**KEY FEATURES:**

- Length: 3m/3.5m/4m/5m/customized
- Made of UHMWPE ropes
- Australian made, Australian tested
- UV resistant, waterproof and more durable
- Very light, can float in water
- Take up little space, easy to store
- Soft eye at both ends with protective sleeves
- Breaking data is minimum breaking strength when straight pulling
- Visible colour

# KINETIC ROPE

**KEY FEATURES:**

- 100% double braided Nylon
- 30% stretching, increasing kinetic energy
- Abrasion-resistant coated eyelets offer longer life
- Water, UV and abrasive resistant
- Reduces potential of damage for both vehicles
- Hand spliced in house and rigorously tested
