

dfuser 2005+ Headlight Conversion

Parts List:

- Dfuser 9007 to 9008 Pigtails (included in base package unless upgraded to harness)
- Dfuser 9007 to 9008 Heavy Duty Headlight Harness kit with Relays (optional upgrade; pigtails not included)
- Ford 2005+ Headlights (Left and right)
- Stainless Steel Headlight upper mounting kit (Screws, Washer, and clips)

Tools:

- Dremel Tool
- Philips Screw driver
- Socket and Ratchet to loosen bumper (19mm!)

Installation:

- Remove Front Grill
- Loosen the front 4 bolts by the hooks that hold the front bumper (Do not remove)
- Remove the 2 screws holding the turn signal assembly on each side
- Remove the turn signal assembly (Unplug light harness)
- Remove Headlight plugs and bulbs
- Remove Old Headlights (You will have fun with those, 2 clips visible and a hidden plastic clip). It may be easier to remove the complete header panel or the Batteries to reach the factory 9007 headlight clips.
- Start trimming (see pictures for reference)
- Test the headlights from proper fit
- Re-use the bottom screws for the turn signal assemblies to mount the new headlights on the bottom
- Use the provided SS screw kit to mount the headlights on the top
- Use the provided 9007 to 9008 HD kit to power the high and low beams
- Move the orange bulbs from the new headlights to the plugs on the old turn signal assemblies
- Re-use the turn signal and small lights from the previous assemblies to mount to the headlight
- Re-Install the grill
- Align the bumper and tighten the bolts
