EASY PLUS SERIES APPLICATION GUIDE

FOR HIGH VALUE CROPS IN SOIL / COCO / SOILLESS

Measurements are in tsp / US Gallon (500 PPM SCALE)	GROWTH STAGE	APPLICATION AMOUNT	PH RO WATER	TDS RO WATER (PPM MEASURE)	PH TAP WATER	TDS TAP WATER (PPM MEASURE)
EASY GROW +	Early Vegetative	2 tsp	6.3	510	6.5	630
	Late Vegetative	1 tbsp	6.4	760	6.5	920
EASY BLOOM +	Early Flower	2 tsp	6.2	585	6.4	620
	Late Flower	1 tbsp	6.2	940	6.4	960
	Aggressive Flower	1 tbsp	6.2	1690	6.4	1830

1. For cuttings and clones, use half strength of Week 1 of Easy Grow Plus until rooted.
2. After every 3 applications of a nutrient solution, we recommend flushing the medium with pH adjusted water alone.
3. Always allow additional mixing time, and maintain a pH between 5.8-6.3.
4. In the case of tip burn or nutrient lock up, flush twice with pH adjusted water, then scale back measurements by 10-20%.
5. Use pH adjusted water to flush the soil during the last 3-5 days before harvest.
