Maintain pH between 5.8 and 6.3

- 1) If you are flowering longer than 8 weeks, repeat week 8 for each additional week.
- 2) If you are getting excessive tip burn or nutrient lock up, do 2 straight water flushes then scale back measurements by 10-20%.
- 3) Feed pH adjusted water every third feeding.
- 4) Flush with straight water for the last 3-5 days before harvest.
- 5) Allow additional mixing time between each additional product.
- 6) If vegging longer than 6 weeks, repeat week 6 for additional weeks.
- 7) For cuttings and clones, use half strength of Week 1 of Easy Grow Plus.
