Maintain pH between 5.8 and 6.3

ALWAYS MIX MICRO FIRST BEFORE ADDING GROW OR BLOOM

- 1) If you are flowering longer than 8 weeks, repeat week 8 for each additional week.
- 2) If you are getting excessive tip burn or nutrient lock up, flush your system with pH adjusted water then scale back measurements by 10-20%.
- 3) Flush with straight water for the last 3-5 days before harvest.
- 4) Allow additional mixing time between each additional product.
- 5) If vegging longer than 6 weeks, repeat week 6 for additional weeks.
- 6) For cuttings and clones, use 1/4 strength of Week 1 of Micro, Grow, Bloom with 1.25mL/Litre of Prop-O-Gator and 1mL/Litre of Super B+ until rooted.
