		Suggested PPM Ra	nge	500-700	800-1000	1000-1200	1100-1300	1200-1400	1300-1500	8	300-1200	900-1300	950-1350	1000-1450	1000-1500	1100-1400	1000-1350	1000-1350	

Maintain pH between 5.8 and 6.3

ALWAYS MIX MICRO FIRST BEFORE ADDING GROW OR BLOOM

- 1) If you are flowering longer than 8 weeks, repeat week 8 for each additional week.
- 2) If you are getting excessive tip burn or nutrient lock up, do 2 straight water flushes then scale back measurements by 10-20%.
- 3) After two applications of a nutrient solution, flush the medium with pH adjusted water.
- 4) Flush with straight water for the last 3-5 days before harvest.
- 5) Allow additional mixing time between each additional product.
- 6) If vegging longer than 6 weeks, repeat week 6 for additional weeks.
- 7) For cuttings and clones, use 1/4 strength of Week 1 of Micro, Grow, Bloom with 5mL/Gal

of Prop-O-Gator and 4mL/Gal of Super B+ until rooted.
