- 3) After two applications of a nutrient solution, flush the medium with pH adjusted water.
- 4) Flush with straight water for the last 3-5 days before harvest.
- 5) Allow additional mixing time between each additional product.
- 6) If vegging longer than 6 weeks, repeat week 6 for additional weeks.
- 7) For cuttings and clones, use 1/4 strength of Week 1 of Micro, Grow, Bloom with 5mL/Gal of Prop-O-Gator and 4mL/Gal of Super B+ until rooted.
