Product Data Sheet

SILICA UP

DILUTION RATE:

Start by adding 1 mL per gallon of Silica Up into your nutrient solution and mix well. Check the pH level of your solution with a meter. Add small increments of Silica Up while mixing until you have reached your desired pH level.

ACTIVE INGREDIENT:

Potassium Silicate 30% "Concentrate"

GROWTH STAGE:

Rooting Vegetative Flowering

FREQUENCY:

Every feeding

FOR USE IN:

Soil Coco Hydroponics Silica Up will raise the pH level of your nutrient solution.

The ideal pH for most hydroponic nutrient solutions is between 5.8 and 6.2, with some exceptions.

Nutrient lockout will occur if pH levels are outside optimal levels.

SIZE	HEIGHT X WIDTH			WEIGHT	
1 L	9.0 in	Х	3.0	in	2.8 lbs
4 L	12.5 in	Х	6.3	in	6.3 lbs
20 L	16.0 in	Х	10.0	in	63.1 lbs
