

SUCK IT UP is a foliar spray enhancement that is compatible with all brand name nutrients, additives and pesticides.

Suck it Up passes directly through the waxy cuticle of your plants' leaves, through the spaces in the upper epidermis, delivering the product to its intended target.

The built in pH indicator in Suck it Up helps provide superior leaf penetration at all pH levels.

DIRECTIONS:

- Add 15ml (1 tbsp) to each liter (4 cups) of foliar spray.
- Adjust the pH accordingly.

Fertilizers & Growth Regulators

For seedlings & young plants use pH 6.5 to 7.0
For mature plants use pH 6.0 to 6.5

NOTE: The indicator in Suck It Up is meant to remind the user to pH their solution; the pH should be verified using a Nutri-sig pH meter.

Pesticides

All plants use pH 4.5 to 5.5

Purple: 6.8 and above

Brown: 5.2 to 6.8

Yellow: 5.2 and below

GUARANTEED ANALYSIS

Soluble Potash (K ₂ O)	0.1%
Derived from: Potassium Bicarbonate	
Contains Non-Plant Food Ingredients:	
Alkyl Alkylates	5%
5,5'-dibromo-o-cresolsulfophthalain	0.01%
