

FUTURE HARVEST NUTRIENTS

Product Data Sheet

DILUTION RATE:

Use 0.5g per 1 Litre (Quart) 5g per 10 Litres (2.5 gallon) or ½ Tsp per gal.

GUARANTEED ANALYSIS:

Available Phosphate (P₂O₅) 49%
Soluble Potash (K₂O) 32%

Derived from:

Monopotassium Phosphate

GROWTH STAGE:

Mid-Flowering/Bloom.
For use during weeks 4 and 5 of flowering.

FREQUENCY:

Every feeding

FOR USE IN:

Soil
Coco
Hydroponics

TON O BUD (POWDER)

Ton O Bud is one of the best selling, if not the best selling, additive in Future Harvest's extensive additives range!

It is globally recognized and has a proven reputation as one of the most powerful plant enhancing additives on the market.

Ton O Bud is a concentrated P-K (phosphorous and potassium) additive designed to pack bulk onto flowers and fruits during the middle stages of the flowering cycle.

The benefits are plain and simple: higher end yields, drastically increased flower set (meaning more flowers are present), tighter and more compact density, and all without compromising quality and flavour!

KEY FEATURES

- Does not significantly add to EC levels unlike most P-K products.
- Works alongside, and in addition to, all industry leading manufacturer feed schedules.
- Produces rapid and visible results.
- Works for all grow media and methods.
- Tried, tested and recognized worldwide.

SIZE	HEIGHT X WIDTH	WEIGHT
100 g	6.5 in x 4.0 in	0.2 lbs
500 g	4.0 in x 3.5 in	1.1 lbs
1 Kg	7.3 in x 3.8 in	2.2 lbs
10 Kg	13.5 in x 10.0 in	24.3 lbs
