### **8.1 Control parameters**

Potassium Nitrate ACGIH TLV® TWA 5 mg/m<sup>3</sup>

Manganese Sulfate ACGIH TLV® TWA 0.2 mg/m<sup>3</sup> OSHA PEL Ceiling 5 mg/m<sup>3</sup>

**8.2 Appropriate engineering controls** General ventilation is usually adequate. Use local exhaust ventilation and enclosure, if necessary to control amount in the air.

**8.3 Individual protection measures, such as personal protective equipment**

General information: Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Eye/face protection: Wear safety glasses with side shields (or goggles).

Skin protection Hand protection: Chemical resistant gloves

Other: Wear suitable protective clothing.

Respiratory protection: In case of inadequate ventilation, use respiratory protection.

Hygiene measures: Provide eyewash station and safety shower. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing to remove contaminants. Discard contaminated footwear that cannot be cleaned.
