

CITRIC DOWN

FOR MARKET PURPOSES ONLY

4L/135.2 fl.oz. (US)
4.4 Kg/9.7 lbs

MADE IN CANADA

pH Adjuster

CITRIC DOWN will lower the pH level of your nutrient solution. The ideal pH for most hydroponic nutrient solutions is between 5.8 and 6.2, with some exceptions. Nutrient lockout will occur if pH levels are outside optimal levels.

ACTIVE INGREDIENT:
Citric Acid

DIRECTIONS:

Start by adding 1 mL per gallon of Citric Down into your nutrient solution and mix well. Check the pH level of your solution with a meter. Add small increments of Citric Down while mixing until you have reached your desired pH level.

MODE D'EMPLOI:

Commencer par ajouter 1 ml par gallon de duvet citrique dans votre solution nutritive et bien mélanger. Vérifier le niveau de pH de votre solution avec un mètre. Ajouter de petits incréments de duvet citrique tout en mélangeant jusqu'à l'atteinte du niveau de pH souhaité.

Compatible with most quality brand fertilizers. For best results use the complete line of Future Harvest Nutrients.

Information regarding the contents & levels of metals in this product is available on the internet at <http://www.aaptco.org/metals.html>
