

indigraph

EN

What is it?

Indigraph is a fountain pen designed to keep the ink fresh allowing the use of special inks like indian and calligraphy ink. The purpose of the product is to avoid the clogging of the nib, making it ideal for artistic use.

Indigraph has a water reservoir with a special membrane that allows humidity to keep the nib wet.

⚠ Caution

Warnings:

First fill the reservoir with water.

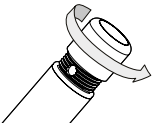

Do not let the nib exposed to the air without cap if it is not in use.

Keep the reservoir always with water.

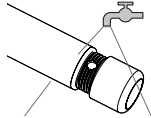

Do not fill with hot water.

Clean the pen monthly.

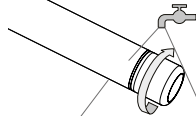

Load Water

Open the reservoir cap until the hole appears.

Place it under the tap with the hole upwards.

Once filled, close the cap under the tap.

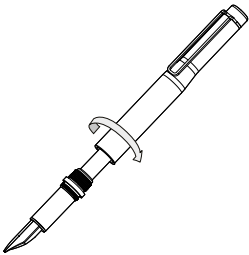

Water level can be seen through the window.

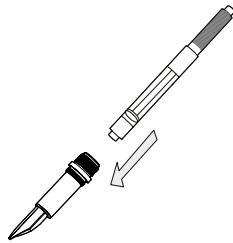

⚠ Close softly.

Load Indian ink

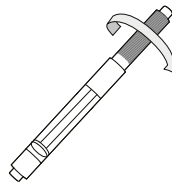

Converter method

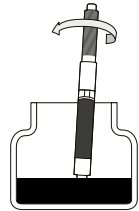

Disassemble the body.

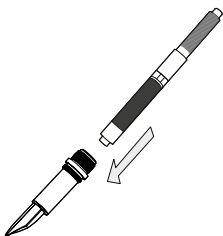

Remove the converter from the grip.

Slide piston for next absorption.

Introduce the tip into the ink and twist until it is full.
Clean when finished.

Put in the grip.

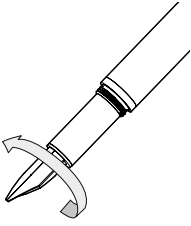

Twist counter-clockwise until a drop falls.

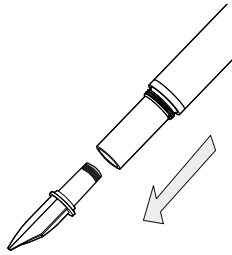

Assemble the body and clean the nib.

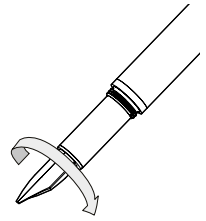

⚠ First clean the nib.

Twist the nib counter-clockwise holding firmly the grip.

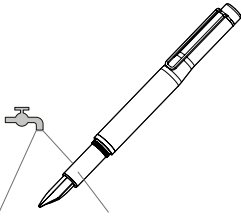

Take out and change the nib.

Assemble to the grip twisting clockwise.

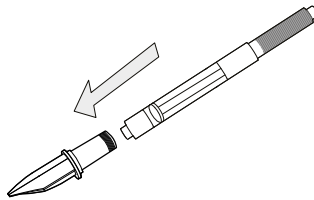

Cleaning Indian ink

Dry ink

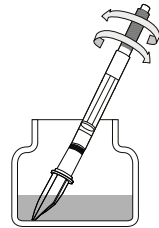

Place the nib under the tap.

Clog ink

Disassemble the converter and the nib out of the fountain pen and assemble both pieces.

- 1) Fill and empty the converter with water and few drops of ammonia.
- 2) Submerge at least 2 hours the nib in water and ammonia and let the ammonia work.
- 3) Repeat first step to ensure optimum cleaning.
