

BOTOX EFFECT WITHOUT INJECTION

DERMATOLOGICALLY TESTED

HIDE YOUR WRINKLES
IN JUST 2 MINUTES

LONG LASTING EFFECT WHEN
REGULARLY APPLIED

LARIMIDE®

Spain

At a young age, our skin quickly recovers from daily aggressions caused by stress, UV rays and dehydration.

But as we age, our visage's skin faces more and more challenges: it begins to lose its ability to recover from hormonal changes, aggressions of the environment, etc ... These damages show up in fine lines, loss of firmness, wrinkles and other visible signs of aging.

LARIMIDE® is a potent immediate lifting effect serum that quickly and spectacularly hides wrinkles, fine lines and combats the loss of facial firmness. Furthermore, it helps the skin's repairing process.

LARIMIDE® is based on a technology of branched sugars purified fraction from oat. A molecule of high molecular weight, that form a three dimensional network thanks to the hydrogen bonds creating a lifting effect on the skin.

Thanks to the sugar branches, a three dimensional network is created, with a large number of interactions between molecules and intercellular lipids of the stratum corneum membrane, the outermost layer of the skin. These interactions are maintained once the product is absorbed creating a film on the skin.

Moreover, the process of skin repair is enhanced by the presence of two macropeptides present in LARIMIDE®, which regulate cellular activities by interacting with specific genes involved in the reconstruction process of the extracellular matrix.

LARIMIDE® COMBINES

EFFICACY OF IMMEDIATE EFFECT

With LARIMIDE® skin instantly has an appearance of less wrinkles.

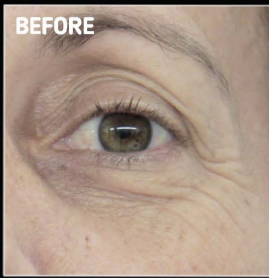

In two minutes we achieve a new level of perfection and firmness in the skin.

The facial contour is firmer, smoother and defined.

It hides eye bags in record time.

LONG-LASTING ACTION OF WRINKLE REDUCTION

In just 4 weeks, skin looks smoother and regains its firmness and elasticity. 72% of volunteers showed a significant reduction in the appearance of fine lines (-33%) and (-17%) wrinkles.

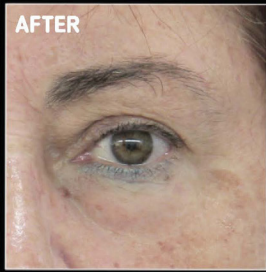

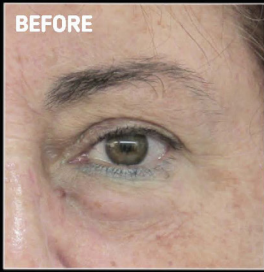

HOW LONG DOES THE EFFECT LAST?

The effect of LARIMIDE® may vary depending on the skin type. Likewise, its duration is not always the same. You can use LARIMIDE® as many times a day as you want, not only in the most special moments.

HOW MUCH QUANTITY SHOULD I APPLY?

You should use a very small amount of LARIMIDE®, the size of a pea, on each area to be treated, since it has a very concentrated formula and the results require the exact product quantity. If you use too much, a white residue may appear on the skin.

WITH **LARIMIDE®** WITHOUT

HOW DO I APPLY ? **LARIMIDE®**

With hydrated and dry skin, apply a small amount on the index finger and spread it on the wrinkled area through a light tapping. **LARIMIDE®** should not be rubbed. Let it dry and you will notice the action immediately. The faster it dries, the better (use a fan, if you can, to speed up the process). Avoid direct contact with the eyes. Try not to make facial gestures while you apply it, the results will be better.
