

Cool Control 2.5 l

Perfect trend specialities in the workplace

Coffee creations with milk and milk foam are hugely popular. For perfect results, they need milk that is chilled to 4 °C. The Cool Control with its dishwasher-safe stainless steel milk container is really easy to fill and keeps the milk at the ideal temperature for the whole day. Thanks to its large holding capacity of 2.5 l and locking mechanism included as standard, the cooler is ideally suited to the requirements of any professional setting.

Technical data

Weight	approx. 3.4 kg
Dimensions (W×H×D)	15×23.4×31.9 cm
Article number	24065
Optional accessory Wireless Transmitter	24031

Ideal use of space

The slim and elegant design of the Cool Control allows it to be used in locations where space is limited. The milk cooler's elongated shape means it can easily be fitted into small kitchens and break rooms. This means that trend specialities with milk and light, frothy milk foam can also be enjoyed in the workplace.

Elegant design

The Cool Control reflects the classic JURA look. Premium materials, a cover made of high-quality 1.5 mm thick stainless steel and elegant ventilation slots accentuate the Cool Control's design. With its clean, minimalist lines, the Cool Control 2.5l harmonises with any JURA coffee machine from the X and GIGA X lines.

Maximum convenience

The Cool Control is easy to operate and offers maximum convenience. Milk can be added quickly and easily without needing to remove the milk container. The digital temperature display and precisely fitting cover ensure easy handling. The integrated Peltier cooling element ensures that the milk is kept at a temperature of 4 °C, providing the optimum conditions for perfect speciality coffees with milk. Furthermore, the stainless steel milk container, handle, metal tube and adapter can be washed in the dishwasher, making daily cleaning a breeze.

The perfect accessory for automatic coffee machines in the workplace

The 2.5l holding capacity of the stainless steel milk container enables a significant number of preparations of speciality coffees with milk. The wireless* communication between the Cool Control and the automatic coffee machine and the integrated level indicator ensure that the user is always reminded when the cooler needs to be topped up with milk. It also comes with a locking mechanism to protect it from manipulation. The Cool Control is therefore the perfect addition to professional units in the X and GIGA X lines from JURA.

*By using the Wireless Transmitter (available as an option)
