

40' Steel Stud Bracket Installation Instructions

Before You Begin

- Make sure you use proper PPE; steel-toed footwear, work gloves, eye protection.
- Ensure your tools are in good working condition.
- Read & understand all instructions before beginning.

What you will need

- Screw Driver
- Drill

What is included

- 40 Composite SSB
- Pack of No.8 ½ screws

Assembly

Figure 3 - Steel Stud Bracket Position Top View

Figure 3.1 - Steel Stud Bracket Position Detail View A

Step 1

Install the “Steel Stud Bracket” to the tubing using No.8 ½” in screw as shown (fig 3). Install the 1st SSB at the 2nd corrugation from the doors and then every 4th corrugation (fig 3.1). Using the No.8 ½” screws and screwdriver/drill, fasten the top track with SSB as shown in the figure. Screw into holes (fig. 4). Install 11 brackets spaced evenly along both sides of the container.

Step 2

Install the bottom track to the flooring using No.8 1/2" Screws. (fig. 5)

Step 3

Install the stud every 2nd corrugation starting at the 1st corrugation from the container door side. The center to center distance between each stud should be 22 inches (fig. 6).
