Product Introduction

This series is a professional photo and video LED light with a slim metal body that is light and simple. Both support to adjust the brightness/color temperature which brings great convenience to your shooting. With a digital display and a stable stabilization system, special APP intelligent control system, and practical soft diffusion, the U-shaped bracket that supports 360° rotation improves light control.

Main Features

- Ultra thin and light body
- Delicate Design with removable stand
- High Color-Diminishing Index
- CRI conducive to restore true colors
- PWM Dimming Technology
- Delicate Design with U-shaped bracket that supports 360° rotation
- APP Intelligent Control System
- Convenient Light Set-up and Stabilization System
- Stabilization System
- Aluminum Alloy Housing

Function Introduction

- LED bead
- Soft diffuse locking knob
- U bracket
- U bracket locking knob
- Light stand locking screw
- Hole for light stand installation
- Battery plate
- DC power interface
- Digital display
- Color temperature display light
- Brightness display light
- Restoration of WIFI
- Color temperature adjustment wheel
- Brightness adjustment wheel
- Power switch

Using the light

- Insert the LED light into the light stand by rotating clockwise. Counter-clockwise is unlocked.
- Loosen the U bracket adjusting knob, adjust the angle of the panel when you need. Remember the U bracket adjusting system.
