

Support Rail

Designed for those who like a little extra help getting in and out of bed, the rail moves in unison with your bed and mounts securely to either side.

↑ The support rail comes with an additional bolster that attaches to the opposite bed side keeping the mattress from shifting. A support rail can be added to both sides of the bed if needed. The cover includes a convenient pocket to hold your bed remote. Bolts for the support rail come pre-installed in the bed frame.

Entrapment Hazard

Only remove the support rail cover to wash. Replace immediately before using. Using the bed without the support rail cover may increase the risk of serious injury.
