MADE WITH SUPERFOODS!

SOCIAL Sparkling Wine is now available in 750mL bottles of our 3 botanical flavors. Our innovative wines are lightly sweetened and sparkling with only 44 calories per serving, which is less than half the calories of a glass of champagne and one-third of a glass of red wine.

Current market trends show that younger people are becoming more conscious about what they're putting into their bodies. Because younger generations are more health conscious with their alcohol choices, there is a growing demand for organic, low-calorie, and cleaner drinking options.
