designs

### Aluminum combinations

When it comes to materials used in garden furniture, aluminum is still the leading trend. Besides being classy in a modern way, it offers many practical benefits. It's durable and sturdy yet pleasantly light-weight. Weather and UV will not harm it, nor will aluminum ever rust. In the Ocean Designs collection, aluminum furniture is available in several colours. These colours are applied by means of powder coating, which adds a protective, scratch resistant layer to the material. Of course, the collection also includes high quality matching cushions in countless styles and colours.

### VIRONWOOD

#### The perfect alternative to wood

Vironwood® is a specially developed synthetic material which, thanks to its natural structure, can hardly be distinguished from real (teak) wood with the naked eye. The material is extremely solid, easy to clean with lukewarm soapy water, and UV and weather resistant. Moreover, Vironwood® is very colourfast, certainly in comparison with other plastics used for table tops. Another plus is the fact that Vironwood® can be considered absolutely environmentally friendly. The material contains no harmful chemicals and is 100% recyclable. Vironwood® is used exclusively in Ocean Designs products.

- **Very strong and hard**
- **UV and weather resistant**
- **Easy to clean**
- **Fully recyclable**

#### Introducing QualiCord rope

QualiCord Rope is a weather-resistant cord. This material is not only water-repellent, but also very easy to maintain and durable. The outer layer consists of solution-dyed polyester, followed by a rubber layer containing a polyester thread. QualiCord is high-quality and makes rope even more durable and strong. QualiCord Rope is easy to clean with water and a mild soap solution. A cleaner and protector for rope are also available in our range.

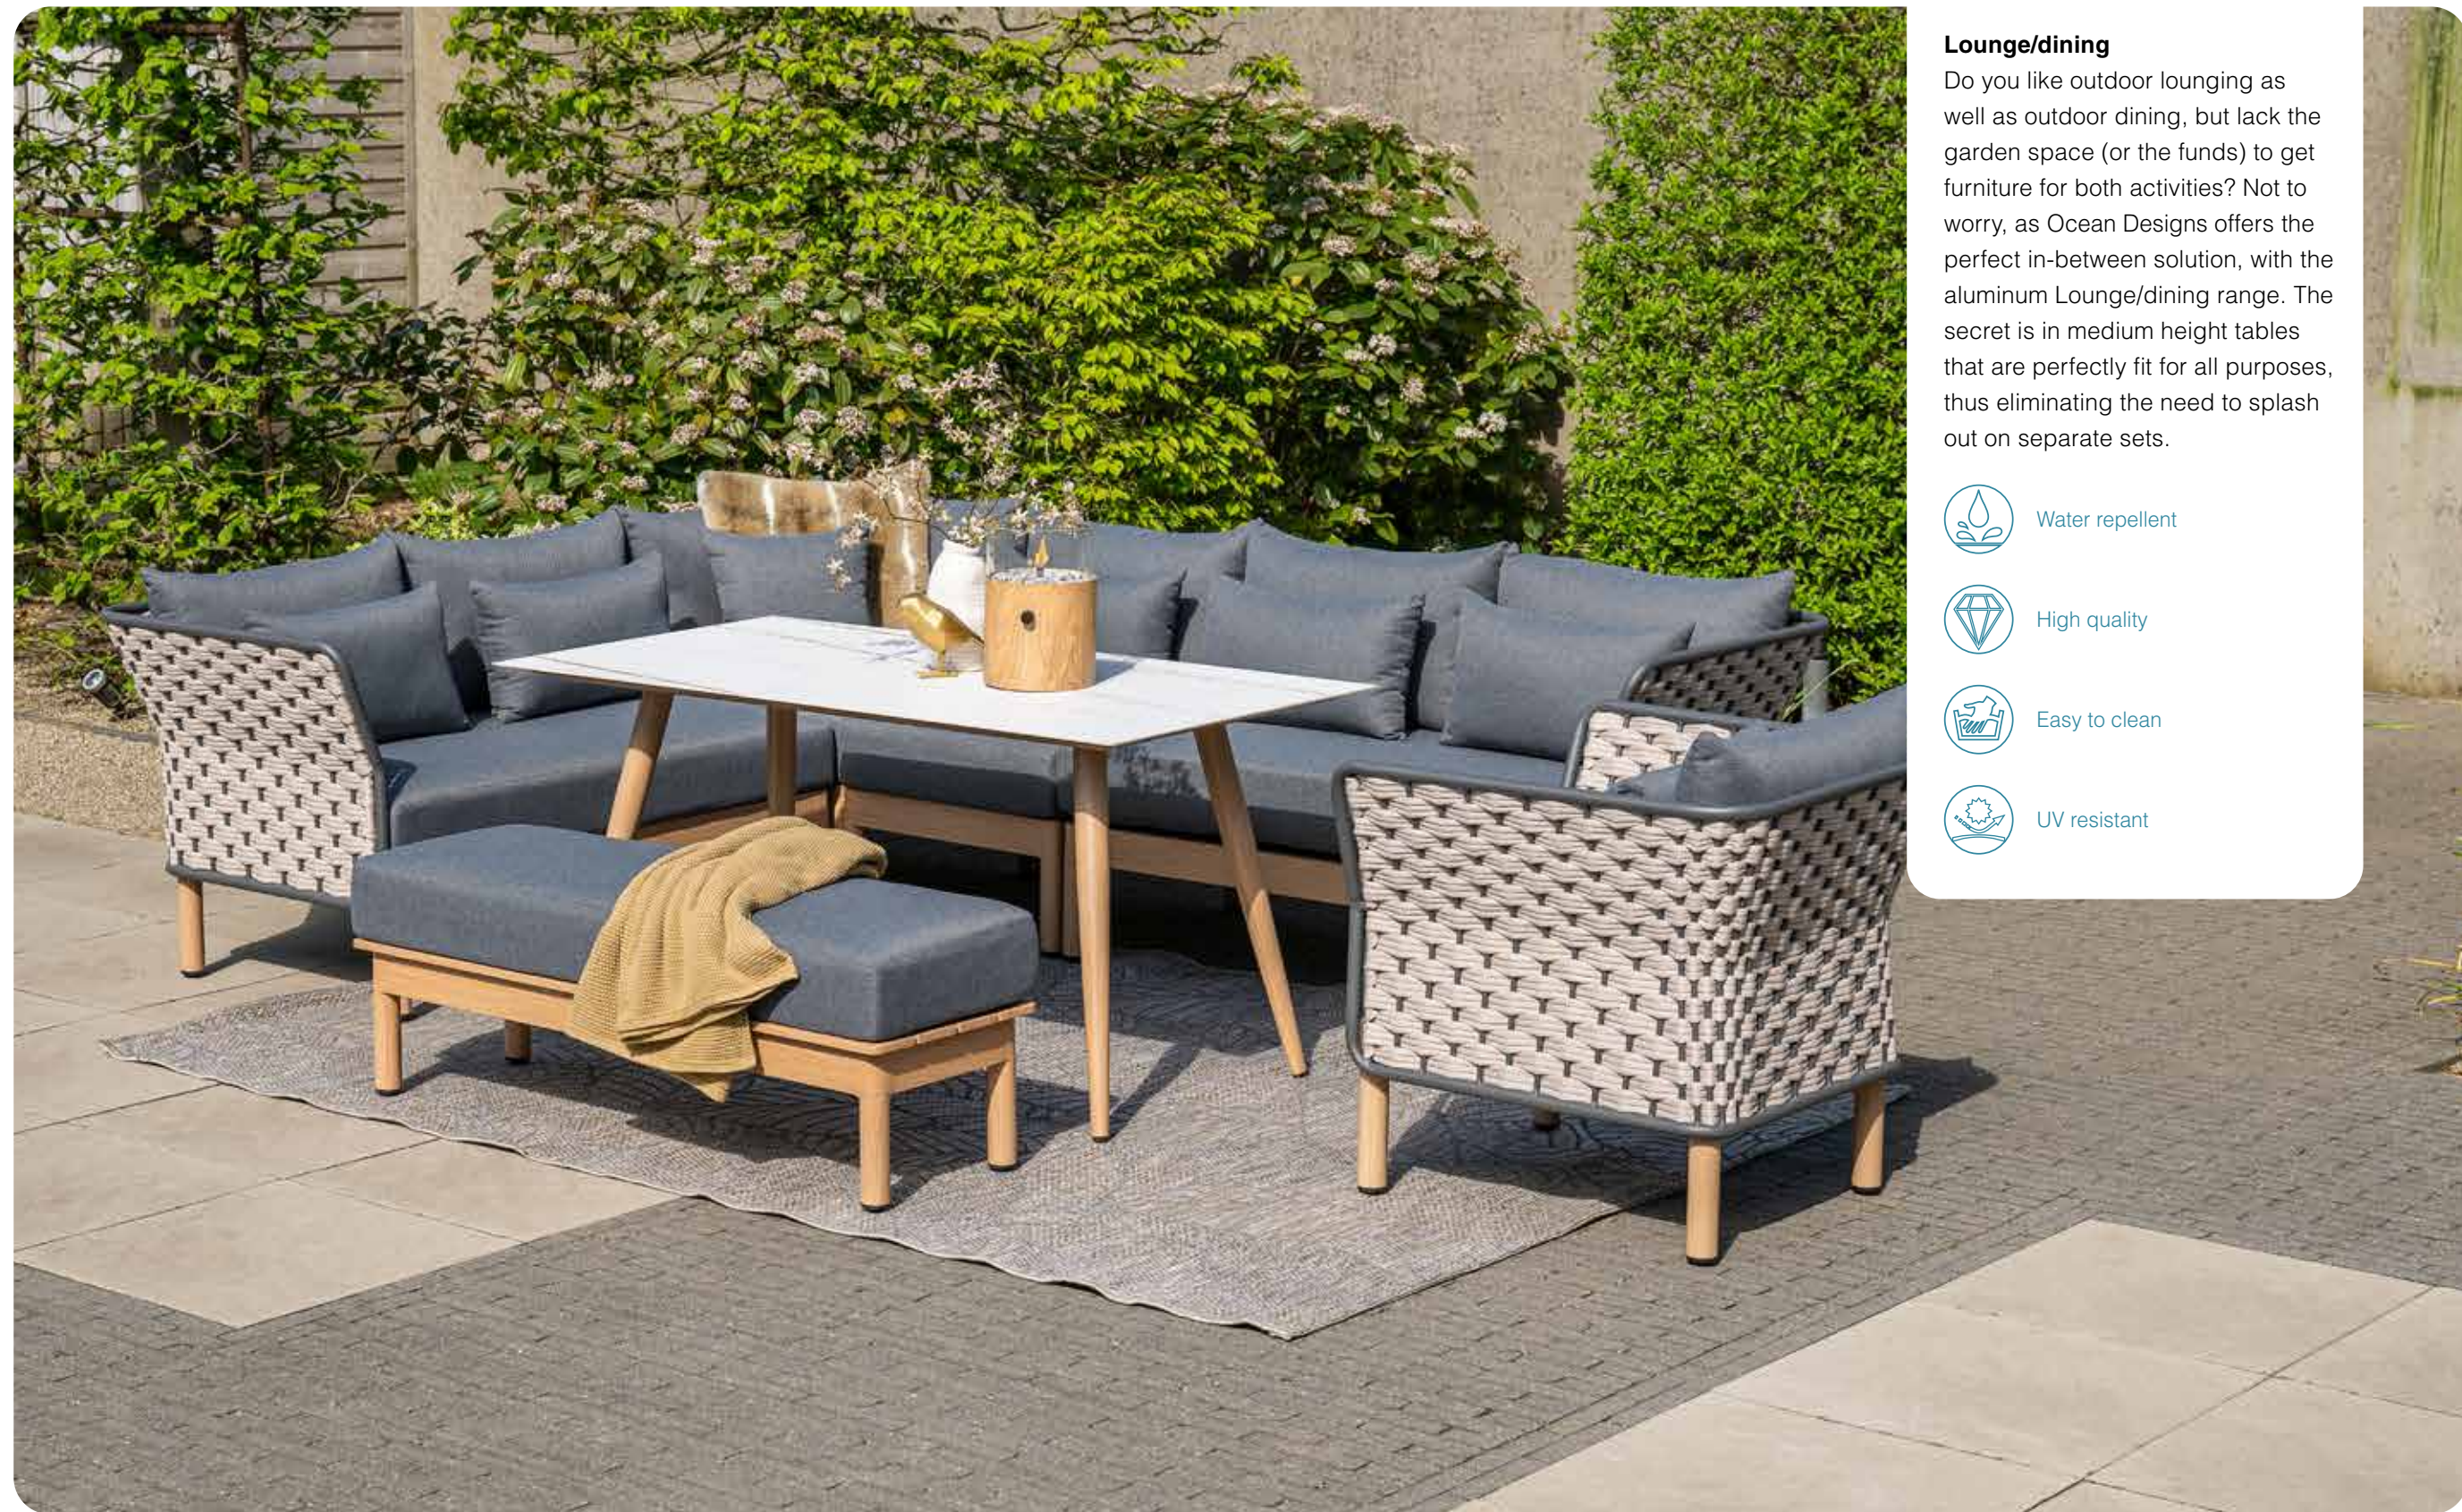

- **Weatherproof**
- **Easy to maintain**
- **Durable**
- **Very strong**

#### A table for life

Centostone® is a great new material for tabletops. It is comparable to ceramics, but much more compact and therefore much harder and firmer. Centostone® is extremely durable and versatile. Due to its extreme hardness, it is resistant to scratches and heat. As the material does not absorb moisture, circles and other stains cannot form and cleaning is easy. Moreover, Centostone® is environmentally friendly, because it largely consists of natural materials and the production process is energy efficient. Centostone® is used exclusively in Ocean Designs products. Available colours: Sicilian grey, Venice white, Rome bronze, Milano brown, and Milano beige.

- **Super strong**
- **UV and heat resistant**
- **Scratch resistant**
- **Moisture resistant**

### Lounge/dining

Do you like outdoor lounging as well as outdoor dining, but lack the garden space (or the funds) to get furniture for both activities? Not to worry, as Ocean Designs offers the perfect in-between solution, with the aluminum Lounge/dining range. The secret is in medium height tables that are perfectly fit for all purposes, thus eliminating the need to splash out on separate sets.

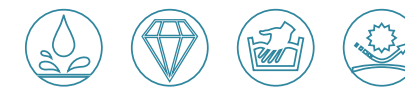

-  Water repellent
-  High quality
-  Easy to clean
-  UV resistant

**Coverit protective covers**  
Your garden furniture deserves the best protection, also when stored after use. The Ocean Designs Coverit range features protective covers in all shapes and sizes. They are made out of a watertight fabric that has the ability to “breathe”. Some types even have a special ventilation pocket to prevent mould. All covers are fitted with elasticized corners, making them easy to apply and keeping them firmly in place.
