UV PROTECTION

Which standard is our UV protection statement based on?

Which standard is our UV protection statement based on?

With the UV Protection test label, Glatz guarantees the maximum possible UV protection of more than 98 percent for the fabric cover classes 2, 4 & 5.

According to the Australian Radiation Protection and Nuclear Safety Agency, all fabric covers from Glatz on the sun protection scale from 15 to 50 have been awarded an Ultraviolet Protection Factor (UPF) of 50+. This seal of approval is only awarded for sun protection products that offer more than the highest sun protection value of 50. In addition, an independent test lab SQTs has guaranteed the maximum possible UV protection of more than 98%.

SHADE IN SWISS QUALITY

High performance precision engineered products.

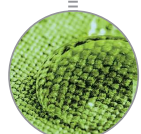

Glatz centre pole and cantilever parasols offer a superior quality compared to other brands, providing a host of safety & product features along with a huge choice of styles, sizes, colours, lighting and protective accessories. Here are why more and more retailers and consumers are choosing Glatz.

Swiss design, built from high quality precision engineered materials that stand the test of time.

The fabric you choose adds a touch of class to a parasol. Our range of high quality fabrics and spectrum of colours can complement the architecture of your home, the design of your garden and surroundings.

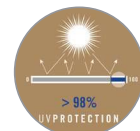

Class 4 fabrics and Class 5 are treated with Teflon™ as well as Scotchguard™ for water and dirt resistance.

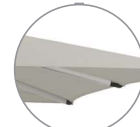

No stretching or straining with a smooth ergonomic hand crank and twist mechanism to open and close, taking the hard work out of operating your parasol.

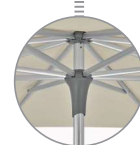

Lightweight aluminium frame and pole make the parasols easy to manoeuvre while remaining strong and rust free.

Glatz parasols filter harmful UV rays with a UPF 50+ rating, keeping you safe in the sun.

Unique extension rods and spring loaded arms maintain canopy tension over time.

Easy to operate features such as stepless height adjustment (ALU-SMART®), gradual tilt (ALU-TWIST®) and multiple tilt angle choices (SUNWING® C+ and SOMBRANO® S+).

Glatz offers a variety of accessories and replacement parts to complement each parasol, from LED lights, protective covers to movable bases and replacement canopies.

Glatz FABRICS & COLOURS

The higher the material class the better the light fastness and choice of colours.

Class 1
