### DESCRIPTION:

WIZARDS® SELECT PRO™ EXTRA CUT ① is an aggressive rubbing compound developed to remove P1200 and finer scratches using a wool or foam compounding pad. This exclusive formula removes scratches quickly on all paint types leaving a fine finish with easy residue cleanup. Reduce compounding time on cured paints by using a wool pad and/or refining sanding process to 2000 or 3000 grit sandpaper.

### BENEFITS:

EXTRA CUT is a fast cut-first step compound that levels quickly without leaving deep scratches or excessive harsh grit residue. This exclusive abrasive compound finishes to a high gloss at a wide RPM range and is recommended for rotary & Dual Action/ Big Throw Polishers.

### FEATURES:

- ♦ WIZARDS® most aggressive compound.
- ♦ Removes P1200 & finer sandscratches.
- ♦ For all paint types.
- ♦ Easy clean-up.
- ♦ Use with wool or white foam cutting pads.

### HOW TO USE:

Starting with a clean, cool surface, apply EXTRA CUT generously, slowly buff/spread in a 2'x2' area. Then increase to run rotary buffer at 1400-2200 RPM. Use WIZARDS® #11203 WOOL PAD (fastest cut) or #11310 WHITE FOAM CUTTING PAD. Continue with firm to moderate pressure making required passes and lifting to light pressure on final passes to bring to a high gloss. Reapply EXTRA CUT as needed, spur pads often and avoid dry buffing. Always wipe clean for inspection using a microfiber cloth, cleaning up all residue and any sling before continuing to the next panel. Continue to WIZARDS® #41002 CUT & POLISH MACHINE POLISH.

### ORBITAL D/A DIRECTIONS:

Apply EXTRA CUT generously to full face of wool or foam cutting pad. Hold pad flat to surface and spread across a 2'x2' section using light to moderate pressure with 3-4 slow passes. Add drops as needed once pad is seasoned and wet. Clean face of pad with nylon brush as needed.
