**Bag Packing** 

# 9ft Jib Stand **Setup**

Using the following pictures and text as a guide for set up, please follow the instructions in order of appearance.

#### Mount The Central Post of the Jib on the Stand

 Slide the Center Post of the Jib onto the Stand (Not Included) Mount and secure it with provided knob

#### Connect the End Section to the Center Post

- Attach the end section of Jib with the Center Post.
- Using a wrench, tighten the dome nut from both sides to secure the two sections.

# **Connecting Front Section to End Section**

- The front section has connecting bars attached to one end as shown. Slide the bars of end section into the slots on front section tightening the two sections together using the supplied Allen Key.
- Tighten the Allen keys as before to secure the sections. Your arm build is now complete.

#### **Adding the Counter Weights**

- Securing the counter weights to the Jib is accomplished by the use of the stainless steel shank. It has two lock offs, one for each side of the Arm to prevent the weights from shifting during use or accidentally falling off the jib.
- Standard exercise weights (not supplied) with a 1' hole are easily rig mountable and are used to equal the weight placed on the camera side of the Jib.
- Once you discover correct balance, consider marking the weights for that particular camera facilitating an easier set up the next time

## **Camera Mounting Plate**

- To accommodate various manufacturers and different sized cameras, multiple slots are provided for attachment.
- You will need to fine tune your counter weights to accommodate camera, head and other accessories being used on the Jib Arm.

# Mounting The Pan/Tilt Head

- If you are using the remote capability of a Pan/Tilt Head, it can be easily mounted to the jib via the 4 slots located at the corners of the plate using 4 screws. Pan/Tilt Head is not provided.
- This assembly is usually accomplished from the underside (bottom) of the jib camera plate.

# **Pin Feature for Tilting Shots**

 Removing the locking pin on the Center Post allows the operator to frame tilting shots by use of the control handle.

• Lock the pin for keeping your camera in a fixed angle to take stable shots.

### **Mounting a Monitor**

 Provisions for LCD monitor (Not Included) mounting to the Jib Arm are built in.

# YOUR PROAIM 9FT CAMERA CRANE JIB ARM ALL DRESSED UP AND READY TO GO!

#### (SHOWN WITH OPTIONAL ACCESSORIES)

**Warranty:** We offer one year warranty for our products from date of purchase. Within this period of time, we will repair it without charge for labor or parts.
