

Service Plan Overview

All KMS service offerings come with a first month of service for free. After the first month, you will be asked to subscribe to a service plan. Service plans are offered in both monthly and annual durations, with discounting for annual service plans and for bulk service plans.

Monthly service plans renew each month at the monthly rate, and provide access to all KMS features. Only tablets that are active in a given monthly billing period incur a charge. Monthly billing is ideal for short-term deployments or for deployments in which there is significant variation in the number of active devices.

Annual service plans provide discounted service pricing for established deployments. With an annual service plan, service is pre-paid for a calendar year from the start of the plan. At the end of the year, a renewal of the annual service plan may be scheduled, or the device allowed to revert to monthly billing.

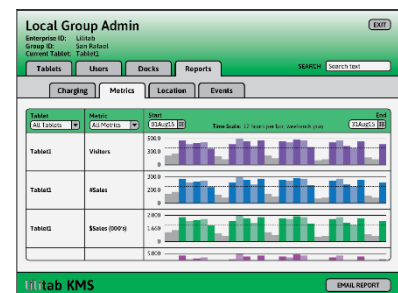

KMS Basic Service

- Cloud-based remote kiosk monitoring and administration platform
- Centralized user management and administration
- Tablet sharing and access control with SmartDOCK
- Geolocation and geofence with configurable alerts
- Customizable metrics to gather kiosk performance data
- Admin Portal with Network, Tablet, Dock, Card Reader status dashboards
- Enterprise and group-level performance and network reporting
- Searchable logging of all kiosk network events
- Configurable administrator alerts
- Group-based registration, configuration, and analytic features
- Content delivery via browser, with configurable home page and domain restrictions
- Available SDK to integrate remote administration features into your iOS app
- Support for PCI-compliant hardware-encrypted card readers
- Configurable forwarding of encrypted magnetic stripe data to secure gateway

Per Tablet: \$4.95 per month or \$49 annually

Add-On Services

Custom Key Injection

All card readers come with Magensa encryption standard at no extra charge. Card readers can also be configured with custom encryption keys for transmission of hardware-encrypted data to any gateway as specified by the customer.

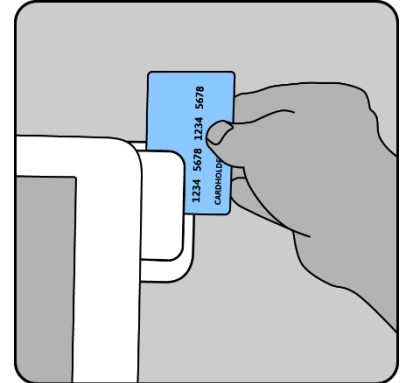

Custom Key Injection: \$30.00 per card reader (one-time charge)

Encrypting MSR Service

This add-on service extends support for the MagTek Intellihead Encrypting Card Reader and the eDynamo Encrypting Card Reader to include secure data decryption and backend forwarding to an approved processor. KMS Encrypting MSR Service features an integration with **Stripe** that facilitates the acceptance of card present swipe transactions with reconciliation to any bank account. The Lilitab KMS app delivers this functionality via JavaScript calls to any web application.

**Per Card Reader: \$8.95 per month or \$69 annually
for unlimited transactions**

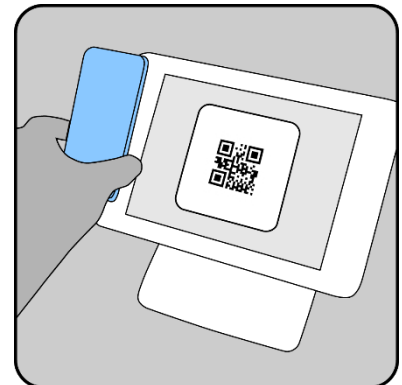

Note: Decryption service does not include processing fees from Stripe or other processor

Barcode Reading Service

KMS includes a free barcode function that is capable of reading a wide range of common barcodes. Some less common codes may require a third-party decoding service. This add-on service provides for commercial-grade barcode reading in a variety of formats including Aztec, Codabar, Code 11, Code 25, Code 39, Code 93, Code 128, Data Matrix, DotCode, EAN, GS1 Databar, MaxiCode, MSI Plessey, PDF417, Postal Barcodes, QR Code, and UPC from both the front and rear camera. The Lilitab KMS app delivers this functionality via JavaScript calls to any web application.

**Per Enabled Tablet: \$3.95 per month or \$39 annually
for unlimited barcode reads**

Bulk Service Plans

Larger deployments may be supported at a discounted rate through the purchase of bulk service plans. Bulk service plans are purchased-in-advance blocks of service credits. Purchase of a bulk service plan creates a pool of service credits that is noted to your enterprise account. When network assets come up for service renewal, that pool of service credits is debited, and device subscription extends automatically, without interruption of service and taking advantage of the lower bulk purchase rate.

As with regular subscription, when the pool of service credits is exhausted, devices automatically revert to monthly service renewal. Purchase of discounted bulk service credits can happen at any time and can be scheduled in advance. Please contact your Lilitab sales representative for details.
